

Accelerate your position in the market for competitive wind energy solutions

Increasing growth in the wind energy sector is raising the competition on the global market. Companies battle to come up with new innovative ideas to meet the growing demand for wind energy solutions.

Now, Port of Aalborg is ready to help your wind energy business reach its full potential with our newest initiative – the Wind Competence Centre.

The upcoming Wind Competence Centre provides a unique possibility for you and other key stakeholders in the wind energy industry who wish to take the next step. It offers unique office spaces in an attractive location for your RD&D team or wind energy project where you will be working alongside world-leading researchers and front-running companies in the wind energy sector. The facilities suit any type of business – from start ups to departments or divisions of larger companies.

Situated in Aalborg, you have easy access to a highly skilled work force as well as the newest know-how and research within wind energy.

As part of the Wind Competence Centre, you will increase your ability to maintain and develop your position in the market for competitive wind energy solutions.

We help businesses target new goals in one of the world's leading hubs for wind energy. Are you ready to take the next step with us?

What can the Wind Competence Centre offer?

- An ideal location for wind energy RD&D projects for all businesses
- An epicentre of innovative ideas and knowledge concerning wind energy
- Great possibilities for building networks and partnerships
- Exclusive offices in various sizes to support your needs
- Short and long-term renting solutions
- Access to meeting facilities, central entrance, toilets, and cantina

WELCOME TO THE WIND ENERGY HUB IN AALBORG:

At the forefront of knowledge and development in the wind energy sector

The new Wind Competence Centre will be located next to BLAEST's world-leading test facilities and the coming FlexFacility production building suited for zero-production and product demonstration

Aalborg plays a vital role as one of the world's leading areas for test and production of wind energy components, and several leading players in the wind industry are present here. The new Wind Competence Centre will be situated in an environment that exudes wind industry activities.

Knowledge and innovation within reach

In Aalborg, you are also one step closer to one of the best technical universities in the world, Aalborg University, where students and scientists are at the forefront of research in wind energy. Four times in a row, Aalborg University has been ranked the best in Europe in the field of engineering.

In our continuous efforts to be at the cutting edge of the development in the wind industry, we have established the Wind Competence Centre – and you are invited to join.

Port of Aalborg – Creating the technology of tomorrow

Port of Aalborg is an industrial business area and an intermodal logistics hub that plays a crucial role in the region's growth. One of our flagships is wind energy and leading players such as Siemens Gamesa Renewables Energy, BLAEST and Bladt Industries reside in our area. Our overarching aim is to support you and other companies in creating the technology of the future – right here in Aalborg.
